Fat
SCI 12h
Regulation of lipid storage
Regulation of lipase activity
Regulation of leukocyte cell−cell adhesion
Regulation of chemokine production
Lipid catabolic process
Hormone transport
Regulation of mast cell activation
Leukocyte proliferation
Lymphocyte proliferation
Monocyte chemotaxis

Marrow
SCI 2m
Morphogenesis of a branching epithelium
Activating cell surface receptor signaling path way
Alpha−beta T cell differentiation
Regulation of leukocyte cell−cell adhesion
Tissue remodeling
NK T cell differentiation
Peptidyl−tyrosine phosphorylation
Regulation of glucose metabolic process
Regulation of hormone secretion
Regulation of glycolytic process
