Pathway Analysis Based on Original Geneset
LDA scores > 2.0, p < 0.05
Wilcoxon, p < 0.05
|Reporter score| ≥ 1.65, p < 0.05
Differential Species Analysis
KEGG Level 3 Pathway Comparsion
KEGG Enrichment Analysis
Create Geneset
Function Annotation
Shared Pathway
SCI 12h vs Control
Phosphotransferase system (PTS)
ABC transporters
Cationic antimicrobial peptide (CAMP) resistance
Biofilm formation − Escherichia coli
Flagellar assembly
Teichoic acid biosynthesis
Cell cycle − Caulobacter
Ribosome
Biosynthesis of various nucleotide sugars
Biosynthesis of nucleotide sugars
KEGG Pathway Reporter Score
4
6
8
SCI 5d vs SCI 3d
Glycine, serine and threonine metabolism
Lipoic acid metabolism
Glutathione metabolism
Lysine degradation
Microbial metabolism in diverse environments
Teichoic acid biosynthesis
Cell cycle − Caulobacter
Ribosome
Biosynthesis of various nucleotide sugars
Biosynthesis of nucleotide sugars
Control
SCI 12h
SCI 3d
SCI 5d
